

Titusville Morning Herald.

Monday, Oct. 31, 1870.

State Election.

No intelligent person can be deceived by the pretensions set up by the Democracy that the late State election argues any revolution in the political sentiment of the country. By scanning the vote and comparing it with the official returns of the previous year, it will appear that neither is there any Republican loss nor Democratic gain worth mentioning. It is simply a case of absenteeism, of general apathy in both parties from which the Republican party, being largely in the majority, suffered the most.

For example: the official vote of Indiana exhibits a Democratic majority on the State ticket of 2,438. Two years ago the Republican majority, after a most desperate contest, was only 961. The Democratic gain in worth mentioning. It is simply a case of absenteeism, of general apathy in both parties from which the Republican party, being largely in the majority, suffered the most.

The aggregate vote polled is 25,000 less than it was in October, 1868, instead of being 15,000 heavier, it all had voted. The Democratic gains were obtained by virtue of more vigorous apathy and numerous absenteeism on the part of their opponents. Whereas 22,000 Republicans neglected to vote, only 18,000 Democrats failed to put in an appearance: 18,000 Democrats concluded to let other people do the voting this time, and 22,000 Republicans "paired off" with them. Without searching for the cause of this absenteeism, the fact is as stated, and if the Republicans have been defeated on their State ticket, they have no one to blame but themselves.

The New York Democracy have now become thoroughly convinced that President Grant will enforce the election law of Congress at all hazards, and are industriously at work to get up a riot on election day. At a Democratic ratification meeting on Wednesday evening a Congressional candidate for re-election—none other than Hon. James Brooks—declared, according to the report of his speech which we find in the *World*, that "if the Federal Government attempts to enforce the elections as they have in South Carolina, 100,000 Democrats in this city would rise in opposition and pitch all the troops they have ordered into the river. If this be treason let them make the most of it." He then advised the Young Democracy to come back to the fold of Tumman and "help them hurl the myrmidons of the law from our shores."

The *Herald* arrives at the conclusion that the dangerous classes will not adopt the desperate course to which they have been incited by the *World* and other Democratic papers. It believes that the rolls will not be carried by the bayonets, and that the city will not be shelled on election day; but that, from the precautions taken for law and order, we shall have a very quiet and orderly election."

EFFECT OF THE EARTHQUAKE ON LAKE HURON.—A Michigander, in a letter going the newspaper rounds, speaks of the effects of an earthquake upon a small lake about forty miles from Detroit—probably Orchard Lake. The water boiled violently and fish and turtles came to the surface in great numbers. A similar effect was noticed on Lake Huron during the earthquake on Tuesday last. Joseph Tibble, a sailor reports to the Detroit *Post* that he was out in a small boat on Lake Huron, about eight miles from shore, off White Rock. Shortly before eleven o'clock, the water of the lake seemed suddenly to boil in small lamps coming up from the bottom. Thousands of fish came to the surface and swam in every direction, as though frightened, and many of them kept leaping out of the water. He never before saw so many fish in one school, or saw them act so strangely. At the same time his boat was tossed about in a strange quick, jarring motion, and he had difficulty in keeping it from dipping water. He was frightened at the remarkable appearance. He knew nothing of the earthquake until he reached Detroit. It will be observed that the appearance of the water and the action of the fish, were very similar in two cases.

WHEN THE FRANCE-PRUSSIAN war opened there were those who looked at it from a money stand-point, and gloried that its wastes and wants would cause a demand for our agricultural products, and that our others would be brought into greater demand. But this rich harvest has not been reaped. Our commerce and trade have not received the expected stimulus, and numerous articles, the products of the countries at war, have advanced in price. And prices will not fall soon, even should the war be at an end. In both Germany and France, numerous manufacturers are idle. Industry is utterly disorganized, and months would elapse before it could be reorganized. Should there be an increased demand for our agricultural productions and an enhancement of prices ultimately, the balance would be against us; for the advance on German and French goods would balance the account, and in the end we should be no better off. So the war is to our advantage, and will be so to the end, whether it be long or short.

THE PHILADELPHIA NORTH AMERICAN says that a large mercantile class contributes almost as much to the prosperity of a place as body of manufacturers. For while a jobbing house may hire an equal number of commercial travellers, drummers, buyers, clerks, book-keepers, porters, etc. in fact, but the inference is too broad and sweeping. For one factory can make but a single class of goods, while one jobbing house will deal in a multitude variety of articles all requiring different arts, trades, processes, and machinery in their manufacture. Production is worth much more than trade, but they ought to flourish side by side.

PENNSYLVANIA CONGRESSMAN—*Genry's Proclamation.*

Gov. Genry has issued his proclamation in regard to those returned to elected to Congress, in which he says:

Now, therefore, I, JOHN W. GEARY, Governor of the Commonwealth, have issued this, my Proclamation, hereby commanding, and declaring that Samuel J. Baird, John V. Creely, Leonard Myers, W. D. Kelley, Alfred C. Harmer, Ephraim L. Acker, Washington Townsend, J. Lawrence, Gatz Oliver, J. Dickey, John W. Killinger, John B. Starn, and John Shomaker, of the First, Second, and Third, and R. J. Haldeman, Benjamin F. Myers, R. M. Speer, Henry Sherwood, G. W. Scobell, Samuel C. Griffith, Henry D. Foster, James S. Nealey, Ebenezer M'Funkin, and William McClelland, have been returned as duly elected, in the several districts as before mentioned, to represent the people of this State in the House of Representatives of the Congress of the United States for the term of two years, to commence from and after the fourth day of March next.

L

Titusville Morning Herald.

Monday, Oct. 31, 1870.

GOOD TEMPLARS.—The regular quarterly election of officers of Sagawatha Lodge L. O. G. T., takes place this evening.

NEW LODGE.—A lodge of Good Templars is to be instituted at New Richmond, Crawford county this week. Rev. J. W. Blaisdell, lodge deputy of Townville lodge officiating.

GAME.—Some of our Titusville sportsmen were out gunning last week. They traversed a large part of Western Crawford, visited Conneaut Lake, and brought back the finest specimen of a blackbird we have ever seen.

SCHOOL EXHIBITION AT SHAMBURG.—Mr. C. L. Stevens, who has a select school of forty-five pupils at Shamburg, is preparing to give an evening exhibition for the entertainment of parents and friends of pupils. The programme will be announced in due season.

THE BERGER Family will perform in Titusville as announced. The magnificence of Mr. Howe, in yielding his right to the sale of reserved seats rather than break up the company's engagement and disappoint the public, is entitled to the highest commendation. Mr. Howe's card will be found in another place.

ELECTED.—On Friday afternoon, four men, headed conductor Doffing, train North of this city, and refused to pay their fare on the ground that they were employees of the Empire line, and should ride free. As they refused to either pay their fare or produce passes, the train was stopped some two miles from the city and they were promptly ejected.

CORRECTION.—A report is in circulation that the late fire in Oil City originated from a defective flue in the roof of Mr. Drake's residence. This report is unfounded in fact as the chimneys are so constructed as to render such an accident an impossibility. The fire was probably caused by a burning cedar falling from the chimney and setting fire to the shingle.

NEW WELL.—The well generally known as the Bates well, belonging to Lockhart and Frew, on the farm next to the McGraw property, Sago run, was finished Saturday. It was tubed in the morning, and in the evening was pumping at the rate of 50 barrels per day. It gives every indication of holding out, and may be fairly set down as a fifty barrel well.

NASBY TO-NIGHT.—Petroleum Vesuvius Nasby will fulfil his first lecture apportioned for the season this evening, at Corinthian Hall. Not to know Nasby, argues one's self unknown. Every body who reads newspapers recognizes him as a familiar acquaintance, and will enjoy an evening's entertainment with him "in search of the man of sin." Go early if you wish to secure a good seat.

MISSION SUNDAY SCHOOL.—A number of ladies and gentlemen connected with St. James Memorial Church have established a Mission Sabbath School on South Franklin street, near the railroad. Yesterday was the first regular meeting since the organization, and there was an attendance of over fifty pupils. A fund has been raised for supplying the needy ones with clothing and for the general objects of the organization. It is a praiseworthy christian effort and merits every encouragement.

FOUR, FIVE AND SIX PER CENT.—Interest allowed on time deposits in Savings' Departmental special facilities being offered to small depositors.

GOVERNMENT SECURITIES of all kinds for sale.

Deposits made and a General Banking Business transacted.

Shamburg Savings Bank,

Shamburg, Pa.

Titusville Morning Herald.

The City and Fortress of Metz.

The city and fortress of Metz have been

made famous by the war between France

and Germany, and are known as the

most strongly fortified city in Europe.

Metz is famous for its fortifications,

and for its capital, which we

report to-day.

Metz is, or was, a fortified city of

France, the capital of the Department of

the Moselle. It is situated at the confluence

of the rivers Seille and Moselle, and

is about 245 miles east by north from Paris.

It was one of the strongest fortresses of

France, ranking next after Strasbourg,

and was garrisoned by 10,000 men even in

time of peace, and surrounded by a re

markable fortification.

The city had, before the war, manufac

tured of woolen goods, hose, plush, bees

, tiles, nails, and so forth. The annual

value of its products was estimated as

equal to \$2,000,000.

Metz is known to the Romans under

the name of Matis, and was called the

place being then the capital of Belgica Gaul.

It was named Matis in the fifth century.

From this it became celebrated as

the capital of Austria, which was after

wards called the Kingdom of Metz, but

which was then called the Kingdom of the

middle part of the ninth century.

Metz was formally united to France in

the year 1842.
